Summary

An engineer with strong motivation, a positive attitude and enthusiasm for new challenges. Have a passion and interest to new technologies. Right now, I am on a way in the career-changing transition process and looking for a job as Junior Software Developer. I have an IT-engineering background. Gained an international work experience in the maritime industry and accounting. As a person, I am structured and organized, able to prioritize and complete tasks with efficiency and accuracy. Enjoy dealing with a dynamic environment and relate to different people, helping and sharing knowledge with others.

From the end of 2020, I have been learning programming, practicing, developing and collaborating on pet-projects by using HTML, CSS, Javascript and React. Knowledge sharing by using relevant business communication platforms. In addition to above, I acquired foundational knowledge of cloud technologies: passed and certified in Microsoft Azure Fundamentals, Data Fundamentals and AI Fundamentals.

Key skills

Progr.language:	Javascript
Framework:	React, jQuery
State Management:	Redux
Styling, Design, etc.:	HTML, CSS, Figma, Bootstrap, Material UI, DOM
Vers.control system:	GitHub, GitLab, Trello
IDE:	WebStorm, VS Code

Work experience
